

UP NORTH EYE CARE

Ocular Health Scan

Your eyesight is priceless, and physicians of Up North Eye Care are here to protect it!

Vision-threatening diseases often have no outward signs or symptoms in the early states, so our practice has begun using state-of-the-art technology to assess the health of your eyes.

The Ocular Health Scan is a quick, non-invasive scan that allows our doctors to see beneath the surface of your retina. This unique technology can help our doctors detect vision-threatening diseases in their early stages, when they are most treatable.

As part of your pre-testing, our technician will perform the Ocular Health Scan which your doctor will review with you during your examination today. The \$50.00 charge is typically not covered by your vision or medical insurance, so this will be added into the cost of your visit today. This charge will cover the scan plus a retinal photo. Any questions you have about the Ocular Health Scan and the results of the scan can be discussed with the doctor during your examination.

Thank you for choosing Up North Eye Care to protect the health of your eyes!

_____ **Yes**, I would like to have the Ocular Health Scan completed today, during my visit.

_____ **No**, I am not interested in having the Ocular Health Scan completed today, maybe next time.
